"Passionate about designing scalable, modular applications, embracing new technologies, and collaborating to find efficient solutions while evolving with the ever-changing tech landscape."

SUMMARY

I am a **frontend developer** with **11 years** of experience in **software development**, including **6+ years** focused on frontend work. I am a fast learner who can quickly adapt to new technologies. I am also learning different technologies to become a **full-stack developer**. I am available to join immediately as a permanent, temporary, or internship employee.

PROFESSIONAL SKILLS

- Web Development:** Experienced in building responsive and user-friendly web applications using HTML, CSS, and JavaScript.
- JavaScript Frameworks:** Skilled in Angular and React.js for developing dynamic and interactive user interfaces.
- UI/UX Principles:** Strong understanding of design best practices to enhance user experience.
- Version Control:** Proficient in Git for managing and collaborating on code.
- Full SDLC Experience:** Knowledge of the full software development lifecycle (SDLC) from planning to deployment. Experienced in working with Waterfall, Safe Agile, Scrum and Kanban methodologies.
- Communication & Coordination:** Strong skills in working across teams and organizing technical discussions.

PERSONAL SKILLS

- Works well with others and enjoys teamwork
- Creative and brings in new ideas
- Takes initiative and organizes events
- Thinks in new and innovative ways
- Quick learner and adapts to new skills
- Communicates clearly and effectively
- Good at coordinating tasks and teams
- Actively participates in company sports and cultural events

KEY SKILLS

- Frontend Frameworks:** AngularJS, Angular, Ionic, ReactJS (learning)
- Frontend Technologies:** HTML, CSS, SCSS, TypeScript, JavaScript, jQuery
- Libraries & UI Components:** Angular Material, Syncfusion, Bootstrap, PrimeNG, AG-Grid, Leaflet.js, Chart.js, ngx-bc, RxJS, Redux
- Backend Technologies:** Express.js, Node.js, MySQL, PostgreSQL, DB2
- SDLC Methodologies:** DevOps, Agile, Waterfall
- API Testing & Development:** Postman, SoapUI, Swagger
- Version Control & Deployment:** Git, Bitbucket, WinSCP
- Tools:** Jira, HP ALM, Rally, Visual Studio, Eclipse, Notepad++
- Design Tools:** Canva, Figma, Inkscape, Corel Draw, Adobe XD, Photoshop, After Effects, Premiere

WORK EXPERIENCE

Frontend Developer	UST Global (India)	2022-2023
Automotive Vehicle Project		
- Developed a platform for buying, selling, and repairing cars, leading a frontend team to ensure timely and quality delivery. - Integrated multilingual services, expanding the platform's reach and accessibility for users across different regions. - Used Redux for efficient state management, improving app performance, reducing errors, and enhancing the user experience.		
Public Utility project (Gas)		
- Utilized AG-Grid to display large datasets in interactive, user-friendly tables, improving data presentation and user engagement. - Leveraged Chart.js to create dynamic line graphs, enhancing data visualization and enabling better insights for users. - Developed reusable components, promoting modularity and easier maintenance, which reduced development time for future updates		
Frontend Developer	TATA Consultancy Services (India)	2017 – 2021
Inventory Management Website		
- Developed a path drawing feature using Chart.js to help users visualize customer movement from rack to rack, improving navigation insights. - Implemented live notifications and inventory updates through WebSocket, ensuring data is always current.		

- Integrated template-driven forms in Angular to simplify form handling and validation, reducing errors.
- Worked closely with UX/UI designers to optimize frontend performance and enhance the user interface.

Fleet Management Project: Filtration company

- Led the UI team to work together effectively and deliver projects on time.
- Collaborated with the Scrum team to understand requirements, present progress, and drive continuous improvement.
- Implemented gauge and line charts to clearly display the completion of usable life.
- Deployed Single Sign-On to enable secure access to multiple applications and services.
- Coordinated with the client and team to discuss requirements based on the design, ensuring alignment and smooth development.

Fleet Management Project: Nordic delivery services company

- Made the website responsive using Bootstrap, ensuring it works smoothly on all devices.
- Handled data streams with RxJS, improving performance and managing how components interact.
- Ensured accessibility by using semantic HTML tags, making the app user-friendly for all.
- Optimized styles with SASS, improving the reusability and maintainability of the application’s design.

Temperature monitoring project

- Learned legacy AngularJS code independently and added a new feature that lets users visualize data using line charts.
- Identified and fixed bugs, improving the app’s functionality and enhancing the overall user experience

Software Tester/Analyst/Lead

TATA Consultancy Services (India)

2012– 2016

Multinational Banking System

- Performed manual testing following Waterfall methodology, validating application functionality and requirements at each phase.
- Verified banking processes using mainframe commands, validated emails, letters, and REST APIs using SoapUI.
- Prepared daily status reports to track team performance and project progress, ensuring transparency and efficiency.
- Coordinated end-to-end (E2E) testing with teams from different companies and vendor employees, ensuring smooth collaboration and successful testing.

Professional Service System (Big four)

- Supported organizational change management in a professional services project, leading the testing and delivery of a financial billing site using ServiceNow.
- Led knowledge transfer (KT) sessions from terminated employees to onboard new teams for a business transition project.

CERTIFICATIONS

- Full Stack Development Course, Udemy
- Web Development with Angular, Solo Learn

EDUCATION

Bharathidasan University, TN

2009 – 2011

- BSc. Animation with Major 3D Modeling, Animation & Design, May 2011. GPA: 7.6

VOLUNTEER ACTIVITIES

- **Flood Relief Volunteer (2018, Kerala, India):** Delivered food, clothing, and essential supplies to shelters, aiding flood-affected communities.
- **Community Support:** Delivered amenities to orphanages, disabled children, and elderly homes, enhancing the quality of life for vulnerable groups.
- **CSR Initiatives:** Supported company CSR efforts by providing books and stationery to underprivileged children and participating in the TCS Marathon for social causes

LANGUAGES

- **Malayalam** - Native
- **English** – Fluent
- **Danish** – Beginner

HOBBIES

- Enjoy exploring nature with friends and family,
- Singing karaoke, and listening to podcasts on new technology trends.
- Spend quality time playing and learning with my toddler
- Networking through tech communities and participating in art and sports groups.

ADDITIONAL INFORMATION

- Actively improving Danish through interactions with native speakers and immersion in Danish-speaking environments.
